Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Toriumi (6,062,868).

Toriumi discloses an apparatus and method for transmission and reception of music data as well as image data, wherein the music data includes melody data as seen in figure 1. Music data and image data are transmitted to a server (33 and 32 respectively) wherein the server includes a receiver for receiving the data. The server imparts additional data into the music data as well as the video data as discussed in column 5, lines 1-40. The additional data is a parameter. New content data is created by the additional data, wherein the addition provides a conversion. Figures 1-3 provide views of the apparatus and operation.

Response to Arguments

3. Applicant's arguments filed 12/20/03 have been fully considered but they are not persuasive.

It is believed that Toriumi reads on the claimed limitations. As claimed, Toriumi discloses each element and function, wherein a melody is transmitted to a server, the

server adds additional data and transmit the created data. Applicant's arguments are not persuasive.
